Tower Crane Test Site Established in North Carolina

Latest CCO tower crane practical exam test site to open on the east coast is at the Pineville (Charlotte), North Carolina headquarters of Heede Southeast, Inc.

By arrangement with tower crane manufacturer, Linden-Comansa, Heede has set up a Linden Comansa model 5211 tower crane in its yard, along with a practical exam test course that meets CCO specifications. The cab-operated, free-standing hammerhead is rated at 90 to 100 ton/meters, and is freestanding to 110 ft. with a 172 ft. radius.

Heede Southeast is the US distributor for Linden-Comansa tower cranes.

Heede is conducting practical exams on an ongoing basis and scheduling written exams on an as-needed basis. The company also offers operator and technician training classes, and has a tower crane simulator available for candidates to hone their skills. To register, candidates should contact Rick Adams at 704-588-3985 or via email at radams@heedesoutheast.com.
